

Ashitosh Lavhate

Pune, India — +91 9518352166 — ashitoshlavhate2@gmail.com — Portfolio — GitHub — LinkedIn

Computer Science Undergraduate — Applied AI, Backend Systems & Automation

Profile Summary

Computer Science undergraduate with experience building scalable backend systems, AI-powered applications, and full-stack products. Skilled in designing REST APIs, optimizing databases, integrating LLMs, and developing production-ready applications using Django, React, Next.js, and Python. Passionate about building products that solve real-world problems.

Education

- DES Pune University** Pune, India
B.Tech — Computer Science Engineering — CGPA: 8.6 July 2024 – June 2028
- KV AFS — CBSE (Class XII)** Pune, India
Percentage: 76.4% Apr 2023 – June 2024

Technical Skills

- Languages:** Python, TypeScript, JavaScript, Java, C, C++
- Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion
- Backend:** Node.js, Express.js, Django, Flask, REST APIs, JWT Authentication, Socket.IO
- AI / Machine Learning:** ResNet50, PaDiM, OpenCV, YOLOv8, NumPy, Pandas, OCR, Groq API, Gemini API
- Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Firebase, Supabase, Prisma ORM, Redis
- Tools & Platforms:** Git, GitHub, Docker, Linux, Figma, Vercel, Railway, Render, Cloudflare R2, BullMQ

Experience

- E-Vakili — Legal Tech Platform** Remote
Chief Technology Officer (CTO) December 2025 – Present
 - Technical Leadership:** Leading product architecture and engineering decisions.
 - Backend Optimization:** Implemented multithreading, optimized database architecture, and improved application responsiveness.
 - Architecture:** Designed scalable APIs, infrastructure, and backend systems.
 - Performance:** Reduced server load through indexing, query optimization, and backend refactoring.
- Google Student Ambassador (Ping)** Remote
Student Ambassador June 2026 – Present
 - Community:** Organizing AI workshops, hackathons, and technical events.
 - Developer Advocacy:** Promoting Google Gemini and Google AI technologies across campus.
 - Leadership:** Collaborating with Google and Ping Network to grow developer communities.
- Erfinden** Remote
Full Stack Developer Intern June 2026 – Present
 - Backend Systems:** Designing REST APIs, authentication systems, and scalable backend services.
 - Frontend Engineering:** Building responsive React interfaces with reusable components and real-time functionality.
 - Collaboration:** Working with cross-functional teams to deliver production-ready software.
- Admatix** Hybrid
Backend Developer Intern March 2026 – May 2026
 - REST APIs:** Designed and implemented scalable production REST APIs.
 - Payments:** Integrated secure third-party payment gateways.
 - Authentication:** Built JWT/session authentication and RBAC.
 - Optimization:** Improved database performance through indexing and query optimization.

Projects

- DoOrDue — Anti-Procrastination App** (*React, Firebase*): Built a psychology-driven productivity platform where users stake money on task completion. Implemented authentication, task management, and real-time updates for 180+ active users.
- DES Unified Platform** (*Next.js, Express.js, TypeScript, PostgreSQL, Prisma, Redis, Socket.IO*): Developing an all-in-one university platform integrating messaging, discussion forums, project collaboration, study resources, dashboards, and campus marketplaces into a secure ecosystem for DES Pune University.
- FlowLens — Next.js Developer Debugging CLI** (*TypeScript, Node.js, WebSockets*): Built a developer CLI that streams live UI interactions from Next.js applications to an interactive terminal dashboard, including click tracking, navigation monitoring, form submissions, component hierarchy visualization, and WebSocket communication.
- AI Visual Inspection SaaS** (*Python, Flask, React, ResNet50, PaDiM, Groq API*): Developed an AI-powered manufacturing quality inspection platform using ResNet50 feature extraction and the PaDiM anomaly detection algorithm to identify defects. Generated CPU-based anomaly heatmaps and integrated the Grok API to produce contextual inspection reports with actionable recommendations.

Achievements & Activities

- 4th Place — Ignitia, MIT WPU (2026):** Ranked 4th among **270+ teams** at a national-level hackathon.
- 5th Place — Navonmesh, IMCC (2026):** Delivered a competitive technical solution evaluated by an industry panel.
- 2nd Runner-Up — InnoQuest, IEEE (2025):** Recognized for rapid prototyping and cross-functional collaboration.
- Smart India Hackathon — Internal Qualifier (2025):** Selected among ~150 teams to represent the college.
